WRIGHT STANDARDS LLC

Capability Statement: Independent review for AI-enabled systems and automated workflows

Company Overview

Wright Standards LLC provides independent test, evaluation, and review services for AI-enabled systems and automated workflows. We help agencies and their contractors determine whether AI outputs stay within scope, perform consistently, and remain defensible as use expands, using documented severity scoring, risk classification, and escalation logic that support oversight and governance responsibilities.

Founder Background

Ashly Wright brings more than a decade of quality assurance, audit-readiness, and data-quality experience across regulated healthcare operations and large-scale AI and computer-vision data programs. Her work includes CAPA and root-cause analysis, audit support with zero major findings, quality dashboards for leadership, and structured review of annotated data at 98%+ accuracy.

Core Competencies

- **Independent AI Test and Evaluation:** review of outputs and workflows against explicit quality standards and tolerance thresholds.
- **Severity Scoring and Risk Classification:** 1–5 severity scale and Green, Yellow, Orange, and Red risk zones tied to operational consequence.
- **Variance and Consistency Analysis:** targeted testing to surface repeatable failure modes before they scale.
- **Evaluation System Design:** review criteria, scoring rubrics, reviewer guidance, and escalation rules.
- **QA and Human-in-the-Loop Oversight Review:** assessment of whether existing review structures are sufficient.
- **Reliability and Controls Advisory:** corrective action roadmaps, monitoring plans, and escalation frameworks.

Typical Public Sector Applications

- Benefits, eligibility, and case-processing support tools
- Constituent-facing chatbots and virtual assistants
- Generative AI pilots, document summarization, and drafting aids
- AI governance, use-case inventory, and impact assessment support

Company Data

Item	Detail
Legal name	Wright Standards LLC
UEI	RM7UT87K1793
CAGE code	1AXS1
SAM.gov	Registration active
Ownership	Woman-owned; minority-owned
Primary NAICS	541611 Administrative Management and General Management Consulting
Additional NAICS	541690 Other Scientific and Technical Consulting; 541990 All Other Professional, Scientific, and Technical Services

Founder Credentials

- ASQ Certified Quality Improvement Associate (CQIA)
- ASQ Certified Quality Process Analyst (CQPA)
- Lean Six Sigma Green Belt
- A.S., Artificial Intelligence (expected December 2026)

Differentiators

- **Independent.** No stake in the system under review.
- **Consequence-based.** Separates cosmetic variance from material risk.
- **Traceable.** Documented findings that leaders can act on.
- **Fast to start.** Targeted 1–2 week pilot reviews of one or two high-impact workflows.

Standard Deliverables

- Findings Summary Report with severity-scored issues
- Prioritized corrective recommendations
- Documented risk model and escalation framework
- Lightweight monitoring plan
